AMONG ALPINE HILLS.

ONE TRAVELER THINKS WE HAVE BETTER GLACIERS HERE.

He Says That the Famous Grindelwald Are Spindling Apologies for European Glaciers-A Description of Swiss Scenery by an American.

I restrict my use of the word Alps to the mountains of Switzerland, leaving out of account the Tyrolese Alps, which I have not visited. Our first view of an Alpine from. Owners list your property glacier was at Grindelwald. This is a very popular place of resort on account of its ease of access. It is approached most directly from Berne through Lake Thun to Interlachen, thence by a rack and pinion railroad through a most romantic valley 112 E First St. Ground Floor, Old to the village taking the name of the County Building. head of the valley.

Our first eight of the Grindelwald glaclers (for there are two of them) was at the close of the day. To one whose first impressions of living glaciers were received from the magnificent examples in Alaska, these two spindling apologies for glaciers of Grindelwald seemed disappointing ngh, but it was as good as we bave expected, for the glaclers, like the

monarchies of Europe, have abundant reasons for being effete.

The elevation of Grindelwald above the sea is a little over 3,000 feet, so that the glaciers there are at a lower level than most of those in the Alps. Taking into account their ease of access and the marvelous beauty of the valley, I do not wonder at their popularity. The mountain seenery is grand and beautiful enough to make the place popular to begin with, and

the glaciers are thrown in.
It is from Grindelwald that one gets his best view of the Jungfrau, one of the highest of the peaks of the Bernese Alps. Its total elevation above the sea is a little less than 13,000 feet, and it lifts its symmetrical wedge shaped pinnacle, mantled in the purest snow, fully 9,500 feet above the village. Numerous other peaks, varying with the Jungfrau in beauty and grandeur, also greet the eye of the tourist in a noble semicircle stretching around toward the south, and extending from west to east.

ASCENDING GRINDELWALD. A nearer approach to the Grindelwald glaciers, and a tramp upon them, increases the respect even of an Alaskan traveler. The lower of the two especially has for a snow field a noble amphitheater surrounded by the loftiest peaks of this portion of the Alps. Over these peaks the snow is blown by the winds, forming great snow-drifts near their summits, from which they descend in frequent avalanches to augment the quantity which naturally falls into the amphitheater.

Indian Names.

A station not very far from Pittsburg, on the Baltimore and Ohio railroad, has the good old English name of Soho. In announcing it there is no opportunity for the brakemen to disguise the word, as he is too apt to do with the names of other places.

As a train neared the town not long ago the word was distinctly shouted, and a passenger was heard to say to the man sharing his seat:

As the oldest sister, with a number of half sisters and brothers to look after, she developed the stern and practical sense of the father, Dr. Lyman Beecher. Naturally, ber literary endeavors were practical, and being, like all the Beechers, decidedly original, she wrote and published a book which was very charming, though not very exciting, reading to thousands of house-wives all over the country, while in New England her book was kitchen gospel. It was called Catherine Beecher's cook book, and in its way it had a fame almost as great as the novel of her younger sister, and, what is more, those who possessed it believed it, as many of the readers of "Uncle Tom's Cabin" did not. "Uncle Tom's Cabin," yet she did not regard this as her best novel, nor was it the quent reading, gave her the most pleasure. She was never fond of talking of the story, excepting perhaps to her intimates, and they know that the writing of "Uncle Tom's Cabin" was such a barrowing work that she suffered quite as much as any of the readers whose feelings were wrought up by that story.

M. Antonin Mercie, one of the greatest sculptors of Paris, has recently been elected a member of the French academy. The finest equestrian statue in America is the work of this distinguished sculptor. Four years' study and labor Mercle expended on his statue of General Robert E. One Mass of Scales

Afflicted 3 Years by Dreadful Skin and Blood Disease, with Intense Pain and Loss of Hair.

All Other Remedies Fall, Relieved In stantly and Cured in four Weeks by the Cuticura Remedies.

I have a few words to say regarding the CUTICURA REPRIDIES. They have cured me in four
week's time from a Skin and Blood Disease which
I have had for over three years. At certain times,
my skin would be very sore, and always kept
cracking and peeling off in white scales. In cold
weather my face was one mass of scales. When
in the cold air the pain was intense; it would
almost bring tears to my eyes, and my blood also
being in a poor condition, with a loss of hair. I
have tried every known remedy that was recommended to me, but it was of no nee, and gave me
very little benefit. So, hearing of your CUTICURA
REMEDIES, I concluded to give them a trial. The
first application gave aimost instant relief. In a
lew weeks' time I found myself cured, and I nm
thankful for what they have done for me. Your
CUTICURA REMEDIES are a blessing to those who
may have the opportunity to use them. I can
recommend them to any one.
